Projects

Monster job.com clone ✍

- An exact clone of the well-known job search site using React and Redux.
- The tech stacks that used are React, Redux, JSON
- I was responsible for building the Advance search bar, whole page responsiveness, construction and management API with all UI in the frontend.
- Collaborative Project accomplished with a team of 4 members in 5 days.

CoSchedule.com clone

- This is the clone of CoSchedule.com which deals with Organize All Of Your Marketing In One Place.
- It is done with the stacks like HTML, CSS, and JavaScript.
- I was responsible for the whole design of pricing page Notification bar and animation used in this project.
- Collaborative Project accomplished with a team of 4 members in 2 weeks.
- GitHub:- http://github.com/khushbookhator/CoSchedule_clone

Achievements

NLU Basketball champions league,

organized by National Law university(cuttack)
